

Dr. Ravinder Singh is a global digital product and technology leader currently serving as the Head of Digital and Systems Team for the UK Cabinet Office (GCF), where he brings an exceptional record of delivering complex, large-scale strategy and technology programs across the public and private sectors. An expert in emerging technologies like AI/ML, Generative AI/LLMs, and Quantum Computing, he has successfully managed program budgets up to £1.5 billion, led extensive digital transformations, and steered governance and delivery models utilizing frameworks such as TOGAF, Agile, PMP, and PRINCE-2. His distinguished career spans prominent international bodies and corporations, including the World Bank, the Government of India, JP Morgan, HSBC, Credit Suisse, and Accenture, alongside serving as the Advisory Committee Representative for HM Government at W3C, Open API, and TDF. Highly recognized in his field, Dr. Singh was named in Computing.co.uk's Top 100 IT Leaders for 2025 and 2026, serves as a Judge for The National AI Awards, was runner-up for the Open-UK's AI Award 2025, and was nominated for the prestigious Shri Dewang Mehta Award for Innovation in IT. Beyond his corporate and government achievements, he holds a Ph.D. in Computer Science & Informatics from King's College London, an MBA in Information Systems, and engineering degrees from Panjab University, while also being a published author of 15 research papers, a textbook co-author, and a certified executive and life coach.
